# Rusi Wang

Urban Mobility Institute
Tongji University
Shanghai, China

Email: rusiwang@tongji.edu.cn
Homepage: rusiwang99.github.io
ORCID: 0000-0003-3375-4178

## RESEARCH INTERESTS

Transportation network modeling and optimization; multi-commodity flow; dynamic traffic assignment; multimodal transportation; travel demand management.

## EDUCATION

**Tongji University** Sep 2024--present
Ph.D. in Urban Mobility
Shanghai, China; College of Transportation; advisor: Prof. Yuntao Guo

**Tongji University** Sep 2021--May 2024
M.Sc.(Eng.) in Vehicle Operation Engineering
Shanghai, China; Institute of Rail Transit

**University of Electronic Science and Technology of China** Sep 2017--Jul 2021
B.Eng. in Internet of Things Engineering
Chengdu, China; School of Information and Communication Engineering

**Institut Supérieur d'Électronique de Paris** Sep 2019--Feb 2020
Visiting Undergraduate Student Awarded by China Scholarship Council (CSC)
Paris, France

**National University of Kaohsiung** Feb 2019--Jun 2019
Exchange Student
Kaohsiung, Taiwan, China; Department of Electrical Engineering

## SELECTED PUBLICATIONS

### Journal articles

1. Chi Xie, **Rusi Wang**, Dianlei Wang, Bo Zou, Xiaowen Fu, Xiqun Chen, and Qing-Chang Lu. Incorporating revenue loss and congestion cost into rail freight subsidy design: Lessons learned from the China-Europe freight transportation network. *Transport Policy*, 174:103819, 2025. [DOI]

### Conference papers

1. **Rusi Wang** and Chi Xie. A convex programming model for dynamic ridesharing user equilibrium. Accepted for poster presentation at the *106th Annual Meeting of the Transportation Research Board*, Washington, D.C., United States, 10--14 January 2027. Paper No. TRBAM-27-06071. [Link]
2. **Rusi Wang**, Chi Xie, Bo Zou, and Xiaowen Fu. Mitigating revenue loss and congestion surcharge by rail freight subsidy in a multimodal multicommodity freight transportation market. Poster presented at the *105th Annual Meeting of the Transportation Research Board*, Washington, D.C., United States, 11--15 January 2026. Paper No. TRBAM-26-04956. [Link]

Earlier publications are listed on my personal homepage.

## WORKING PAPERS

- **Rusi Wang** and Chi Xie. A Nesterov-style convex programming model for dynamic user equilibrium with maximum entropy selection. *Working paper; planned journal submission*.

## WORK IN PROGRESS

- **Rusi Wang** and Chi Xie. Dynamic equilibrium in multimodal networks with carpooling, autonomous taxis, and public transit. *Work in progress*.
- **Rusi Wang** and Chi Xie. Second-best congestion pricing in dynamic traffic networks: A bilevel optimization model with a convex dynamic user equilibrium formulation. *Work in progress*.

## RESEARCH EXPERIENCE

**LISITE Lab, Institut Supérieur d'Électronique de Paris** Sep 2019--Feb 2020
Visiting Undergraduate Researcher

- Studied melanoma classification with convolutional neural networks trained on dermoscopic images from the ISIC database, under Dr. Ercüment Yılmaz and Prof. Maria Trocan.

## PROJECTS

**Loopae**, software for transportation network equilibrium analysis 2026--present
Lead developer of Loopae, an interactive environment for computing, analyzing, and visualizing transportation network equilibria.

## PRESENTATION

Upcoming presentation, *106th Annual Meeting of the Transportation Research Board* (TRBAM 2027), Washington, D.C., United States, Jan 2027. A convex programming model for dynamic ridesharing user equilibrium.

## SCHOLARSHIPS AND AWARDS

| | |
|---|---|
| Chuangmai Scholarship, Tongji University | 2023 |
| Excellent Student Scholarship, University of Electronic Science and Technology of China | 2019 |
| Scholarship Under the State Scholarship Fund, China Scholarship Council | 2019 |
| Honorable Mention, Interdisciplinary Contest in Modeling | 2019 |
| Model Student Scholarship, University of Electronic Science and Technology of China | 2018 |
| First Prize, Sichuan Provincial Undergraduate Electronic Design Contest | 2018 |

## ACADEMIC SERVICE

Journal reviewer, *Socio-Economic Planning Sciences* (2026).

Updated 14 November 2026.
